## Six questions to find out if your billing system is leaking money. \_\_\_\_\_

- 1 Are you working with patients and not finding time to work on the business?
- 2 Are the billing procedures dependent on one person showing up to work?
- 3 Does your office need help with submitting claims, posting insurance payments and training on billing procedures?
- 4 As a provider, are you updated with reports on how the business is performing?
- 5 Are you able to inspect the billing software and own your electronic health records?
- 6 Are you confident with your billing software and able to train others?

We can safely say this: *Billing is a stress point in running a chiropractic business.*

That's why SIDECAR Billing exists. We are chiropractors who went through the same stress. We thought, "There must be a better way to do this."

We're a flat-fee service that can educate and help your team with the billing system. Or we can take the whole dang thing off your hands and let you do what you do best... patient care.

Is it right for you? Here are our answers to those six questions.

- 1 We have documented financial and office procedures to help all team members make the system work more efficiently.
- 2 We are a billing team department that is available every day with no sick days, with no need for health benefits and we don't ask for performance raises.
- 3 We offer guidance on billing insurance companies and keep you updated on changes in the guidelines.
- 4 We offer the key performance indicators to help you manage and measure your business.
- 5 SIDECAR is owned and directed by chiropractors. Our focus is growing your chiropractic business.
- 6 We find most chiropractic offices only use 30 to 40 percent of their billing software. We help you use the full power of your software and make the process more efficient, increase cash flow and patient satisfaction.

**End your stress.  
Do what you love.**
